© Insulating Glass Certification Council, 1978
PROGRAM CONCEPT

Manufacturers of sealed insulating glass units, consumers, specifiers, and others who are responsible for or concerned with the quality and performance of products purchased in the public interest, recognizing a need for a sound product testing and performance certification program, have jointly established the Insulating Glass Certification Council (IGCC). All IGCC Meetings are open to the public and public participation is encouraged.

IGCC is a non-profit organization which sponsors and directs a program of periodic accelerated laboratory testing and unannounced plant inspections to insure continuing product performance through specified standards. The testing specifications used are outlined in "ASTM E-6 P3 Proposed Specifications for Sealed Insulating Glass". These specifications basically classify sealed units into three categories; C, B, or A, depending upon durability in the accelerated testing. IGCC recognizes that ASTM E-6 P3 and related test methods E-6 P1 and E-6 P2, are "proposed recommended practices", not "full" ASTM standards at this time. It is the policy of IGCC to remain flexible in referencing specifications and test methods in order to best reflect changing technology and new developments.

IGCC's responsibilities through its administrator are to see that periodic inspections and independent laboratory tests are performed on participating manufacturers' products and to validate the right of that manufacturer to use the IGCC label on his product or product information claims.

Management and control of the program is vested in a Board of Governors made up equally of industry and public interest members. The public interest representatives are empowered with 50 per cent of the voting rights, and can veto any action, regardless of the number present at a meeting. This insures against industry dominance of IGCC action.

The organization is operated in compliance with the American National Standard Practice for Certification Procedures Z34.1-1947 (R1959).

The program is under the supervision of a qualified administrator who is not affiliated with any manufacturer of insulating glass, material supplier, or participating testing laboratory, and is hired by and responsible to the Insulating Glass Certification Council. The manufacturers of the products listed herein have certified that the labeled materials comply with the performance characteristics established by ASTM E-6 P3. The compliance of the manufacturers with the requirements of that specification is validated periodically by the IGCC administrator through inspections and testing by an independent testing laboratory under his direction.

Every manufacturer of insulating glass is eligible and encouraged to apply for the right to use the IGCC label. However, permission to use the label is not granted until an independent laboratory test verifies compliance with the requirements. Once all requirements have been met, each product is assigned an IGCC number to identify the product, performance class, and the factory in which it is made. Throughout the year, IGCC requires the manufacturer to certify that the labels are being used only on units that are produced in the same manner and with the same materials as the tested specimens. Based upon these declarations, IGCC authorizes continued use of the IGCC label and the product listing published in this directory.

The Insulating Glass Certification Council wishes to recognize the substantial contributions made by the Safety Glazing Certification Council; the Sealed Insulating Glass Manufacturers Association, American Society for Testing and Materials, the National Bureau of Standards, FHA, HUD, Public Interest Persons, the Industry, and particularly consumers. Without input from such a broad cross-section, this program would not be possible.

MEETINGS OF THE CERTIFICATION COMMITTEE

Interested persons may obtain minutes of these meetings by writing to the Insulating Glass Certification Council.

By-laws are also available by writing to the Insulating Glass Certification Council.

Direct all requests or any comments to:

Mr. Robert A. Nance, P. E.
Administrative Manager
Insulating Glass Certification Council
1640 West 32 Place
Hialeah, Florida 33012

Telephone 305-558-1480
IGCC LABEL REQUIREMENTS

The IGCC certification label must be permanently marked on a visible portion of each sealed insulating glass unit or it is not certified by the manufacturer to IGCC. This label must be visible after installation in the building.

The IGCC permanent label must be in block captial letters, have no periods, be in continuous string (IGCC run together) and have a minimum height of 0.050 inches.

The IGCC permanent label must contain the IGCC number, Class CBA, CB or C and a date code spanning no more than a six month period, plus or minus one month and commencing with the beginning of each calendar year (effective for both the beginning and ending of each period).

The IGCC permanent label must be affixed to certified products only at the time and place of manufacture.

The permanent label must be affixed only to sealed insulating glass units of the participant's own manufacture, which has been certified by the manufacturer to IGCC.

The permanent label must not be sold, transferred or otherwise disposed of in any manner other than being affixed to the participant's certified production.

The permanent label must not be affixed to any product from which certification has been withdrawn or which is produced with a process basically different from the one used when certification was obtained.

Example of minimum label:

A GUIDELINE FOR YOUR ASSISTANCE IN ADVERTISING YOUR PRODUCTS AND THEIR CERTIFICATION STATUS UNDER THE INSULATING GLASS CERTIFICATION COUNCIL, ("IGCC") CERTIFICATION PROGRAM:

The following concepts are important to remember whether you are a Participant or Licensee in the IGCC Certification Program, or supplier to the sealed insulating glass industry. This discussion is intended to provide you with an accurate background description of the IGCC Certification Program, to help you avoid making possibly misleading, deceptive, or ambiguous statements regarding the Program in the advertising of your

1. IGCC is the sponsor of a Certification Program. IGCC does not certify products.

2. The Administrator inspects laboratories and checks their equipment; inspects Licensees' production and fabrication of specimens; and validates test reports and certification claims.

3. Laboratories test specimens to specific test methods and specifications, referenced by IGCC.

4. Manufacturer/Licensees "certify" their products, affirming that their products are constructed similar to specimens which were inspected, tested and found to pass the stated criteria. A Licensee's Certification Statement is the imprinting, sandblasting, etching or other form of permanent marking of an IGCC Certification Program designation and number to its product.

5. IGCC does not have "members", inasmuch as the term "members" carries with it a connotation that some detailed criteria must be met in order to participate in the organization. Under the IGCC concept, anyone can participate, and "participants" simply must possess a "legitimate interest in the purposes of (IGCC)." Manufacturers, on the other hand, which are "fabricators of sealed insulating glass units," become Participants by virtue of executing a License Agreement with IGCC. Any manufacturer of insulating glass may voluntarily enter into a license agreement with IGCC, provided it intends to certify at least one product under the IGCC Certification Program. Thus, the proper term to use for a manufacturer Participant is Licensee.

6. Unit specimens, not their components, are tested under the IGCC Program. Thus, if you are a supplier to the industry, statements indicating that your components have complied with the test methods would be incorrect. A better nomenclature for example, would be, that "Units tested to ASTM E6-P3 containing our X component have been found to meet the requirements of Class Y".

Credibility in Industry Certification through Active Public Participation.

August 1, 1978; IGCC 17
7. For clarity, it is well to remember that the test methods and specifications referenced by IGCC are "proposed" by ASTM, and have not reached full standard status as yet. In advertising, it would be well to quote the term "proposed", or to emphasize the proposed condition in some way. In order to better describe the ASTM test methods and specifications being used by IGCC, listed below is the actual specification (and test methods) which you may want to reference:

   1) Specification: ASTM E6-P3 "Proposed Specification for Sealed Insulating Glass Units". ASTM E6-P3 sets forth classifications by virtue of the durability of time in test as applied to either of the two test methods. These classifications are Class CBA, Class CB and Class C.

   The test methods to be applied to the above specification are:

   1) Test Method: ASTM E6-P1, "Proposed Recommended Practices for Testing Seal Longevity of Sealed Insulating Glass Units"; or

INSULATING GLASS CERTIFICATION COUNCIL, INC.
CERTIFICATION PROGRAM
for
SEALED INSULATING GLASS UNITS
LICENSE AGREEMENT

This agreement, made this day of __________, 19________, by and between
INSULATING GLASS CERTIFICATION COUNCIL, INC., a corporation having its principal office at
1640 West 32 Place; Hialeah, Florida 33012, hereinafter called "LICENSEE" and

having its principal office at hereinafter called "LICENSEE".

WHEREAS, Licensor is sponsoring a Certification Program for Insulating Glass Units, which will provide for the certification of manufacturers' certification of such products by means of independent laboratory testing to the requirements of the Specification(s) and applicable Test Methods as outlined in Appendix A of these Guidelines and Standards, and

WHEREAS, The responsibilities of IGCC, the IGCC Administrator and the Independent Laboratories are limited to the tasks as set forth in this Certification Program; they do not endorse, warrant or guarantee products validated or certified thereafter; and

WHEREAS, Licensor is willing to accept participation in said Certification Program by all manufacturers of Insulating Glass Units under the terms set forth herein; and

WHEREAS, the Licensor's registered labels shall be permitted to be affixed to Insulating Glass units complying with the pertinent requirements of the Program; and

WHEREAS, the Licensor shall contract for the complete administration of the Program and the Licensor shall contract for services with independent laboratories which meet the ethical, financial, and business experience standards of the American Council of Independent Laboratories or National Society of Professional Engineers for performance of tests and other administrative duties as are herein provided; and

WHEREAS, the Licensor shall appoint a "Certification Committee" comprised of representatives of Participants and the Public Interest members of the Board of Governors acting as liaison between Licensor, Licensees and interested parties; meetings of this committee shall be called by the Chairman of the Certification Committee at least twice each year; and

WHEREAS, the procedural guide, to be developed in accordance with paragraph 8A shall be adhered to by both the Licensor and the Licensees; and

WHEREAS, the Administrator shall conduct all aspects of the program in accordance with the highest nationally recognized standards for conduct of such a program, including but not limited to ANSI Z22.1-1959, and

WHEREAS, Licensee is willing to participate in and support said Program under the terms and conditions set forth in the Agreement.

NOW, THEREFORE, IT IS HEREBY AGREED as follows:

LICENSEE:
A.1 Shall, upon the signing of this Agreement, have the same person or authorized agent who signs this Agreement on its behalf and the engineer or other individual designated by such person also sign and submit to Licensor the Certification affidavit attached hereto as APPENDIX A.
A.2 Shall allow Administrator's representative, without prior notice, free access at any time during regular business hours, to Licensor's place of manufacture of Insulating Glass Units certified hereunder and to witness the manufacture of samples which are to be tested for compliance with the requirements. Licensee's refusal to permit access for inspection purposes hereunder may be due cause for removal of its entire product listing from the Certification directory and the withdrawal of its rights to affix Certification Labels thereto. Acceptable reasons for not permitting entrance for inspections would include strikes, acts of God, and circumstances beyond immediate control of the manufacturer. Areas which may have been set aside for research or development and which are not required to be certified and that said tests will be made at the laboratory selected by the Administrator or Licensee from the approved list. Results of each test shall be promptly reported to the Administrator. IGCC will notify the Licensee of compliance or non-compliance. It is further understood that routine expense of sampling and testing will be borne by the Licensee. The Licensee will choose, purchase, and test the samples as set forth by the Administrator. The Administrator will contract for testing with approved testing laboratories. Licenses for packaging, shipping, and purchasing of glass for testing will also be borne by the Licensee. These costs will be handled directly between the Administrator and each Licensee.
A.3 Shall affix to each of its certified products the permanent Certifica-
tion Label, number and class assigned by the Licensee:
a) Only at the time and place of manufacture: and b) Only to Insulating Glass Units of Licensee's own manufacture, which have been so approved by the Licensor.
A.4 Shall not sell, transfer or otherwise dispose of Certification Labels in any manner other than affixing to Licensee's certified product.
A.5 Shall not affix hereafter the IGCC Certification Label, nor Participant's Certification Label registered with Licensor, to any product from which certification has been withdrawn or which is produced with a process basically different from the one used when certification was obtained. A model change shall be as defined by the IGCC Certification Committee.
A.6 Shall upon finding by the Licensor that a certified product of Licensee has been changed as defined by the Certification Committee, have Insulating Glass Units which are subject to a request for waiver of retest or request a new inspection and retest at Licensee's expense if no waiver is granted. Failure of Licensee to act as required immediately above shall constitute due cause for exclusion of this product from the Program.
A.7 May withdraw a certified product from the Program by written declaration and request for removal of said product from the Licensee's listing, signed by the authorized representative of the Licensee.
A.8 shall use all practical means at its command to assure that products hereunder certified fully comply with the Specification requirements, and are manufactured in the manner as test specimens.
A.9 Shall refrain from using terms inferring or claiming certification, validation, accreditation, etc. in connection with advertising referring to products which have not been validated, or from which validation of certification claim has been withheld or withdrawn or any other statement or term which might be interpreted as compliance with this program.
A.10 In connection with the advertising of model systems which the Licensor has approved and granted a certification number or label, the Licensee must use the following couplets as guidelines:
Licensee (IGCC) Sponsors the Certification Program.
Licensee (Manufacturer) Certifies that the product is the same as the model which has been tested.

INDEPENDENT LABORATORIES:
Test the models and report the results.
Administrator Validates the test results through inspections according to the Licensor's guidelines.
A.11 Shall abide by the decision of the Administrator as to the compliance or non-compliance of Licensee's products, determined in accordance with the requirements of the Specifications or testing of such products. It is understood that the Administrator shall be the sole judge of compliance or non-compliance with the Specifications, for purposes of Licensee's certification of such a product under this Program. Where questions involving interpretation arise, the matter will be referred to the Certification Committee for ruling.
A.12 Shall agree to the rules and specifications as established in this Agreement and any rules or specifications which may be subsequently added or adopted by the Administrator.

APPENDIX B:
shall pay the participation fees shown in the Schedule of Fees, which is APPENDIX B hereof, upon signing of this Agreement and at each annual renewal thereof. It is understood, that this Schedule of Fees may be changed from time to time by the Licensor.
A.14 Shall agree that the Administrator may, at his discretion use any and all data, exclusive of Licensee's Company name, address, proprietary product designation or any other information which may be provided as to the manufacture of the products, for the purpose of comparing test methods and correlating test methods with field performance, etc.
A.15 Shall legibly and permanently mark each piece of its certified product in accordance with the marking requirements of the applicable standards and in addition, include a symbol identifying the plant in which the product was made to comply with the standard, for the purpose of identification under this Certification Program.
A.16 Shall furnish Licensee with any information regarding its product as may be necessary to properly identify Licensee's Certified Product for listing in Licensee's Certification Directory.
A.17 Shall comply with all the provisions of said Agreement and the rules and regulations of the IGCC Administrator.
such material is furnished others, copies of its catalogs and other literature excluding price and discount information, which such material lists Licensee's products certified hereunder.
A.19 Shall have the right, at its option, to designate a nominee from Licensee's organization for consideration by the Board of Governors for appointment to the Certification Committee.
A.5 If this Agreement is terminated, then upon the effective date of such termination, Licensee shall be required to affix the registered Certification Labels to any product which Licensee shall thereafter manufacture; and b) Make no further reference to or use of Licensee's Certification Program or registered Certification Labels.
A.6 Licensee, in the event it shall be necessary to exclude Licensee from the participation in the Certification Program in accordance with the provisions hereof, may do so by giving Licensee thirty (30) days written notice of Licensee's termination of the License Agreement. C.7 The interpretation of this Agreement and the parties performance hereunder shall be governed by the laws of the State of Florida and both parties acknowledge and agree that any and all actions brought by Licensee or Licensee for the enforcement of any right or remedy hereunder must be instituted in the court having jurisdiction thereof located in the State of Florida.
C.8 In the event any part or parts of this Agreement are found to be void, the remaining provisions shall nevertheless be binding with the same effect as though the void parts were deleted.
C.9 The use of any IGCC Certification Label or registered participant's label on any unqualified product, or the use of any such registered Certification Label by a manufacturing or assembly or other facility other than that registered will not be permitted by the Licensee, their employees, their representatives, and their agents. If the use of the IGCC or registered Certification Label in contravention of this Agreement is discovered, after a due process hearing before the IGCC, the Licensee will have cause to institute all or any of the following actions: a) Revocation of License. b) Imposition of a fine of $5,000 (one thousand dollars) c) Legal action against the Licensee from having IGCC or registered Certification Labels printed, attached, or used in any manner, the entire cost of such legal action to be borne by the Licensee.
C.10 The Licensee shall pay the reasonable attorney's fees, including attorney's fees for services in appellate proceedings, occasioned by reasonable of Licensee's breach of any of the terms of this Agreement, provided that Licensee promptly shall have determined by judgment of a court of competent jurisdiction and if such judgment be appealable that the time for Licensee's appeal therefrom is terminated. This shall not be construed so as to prohibit Licensee from appealing to the Certification Committee, the Licensee will have cause to institute all or any of the following actions: a) Revocation of License. b) Imposition of a fine of $5,000 (one thousand dollars) c) Legal action against the Licensee from having IGCC or registered Certification Labels printed, attached, or used in any manner, the entire cost of such legal action to be borne by the Licensee.
C.11 In the event Licensee promptly notifies all those to whom it has sent the then most recent issue of the Certification Directory or supplement thereto, as well as the National Better Business Bureau and the trade press, regarding any incorrect listing or reference to Licensee's product published in any Certification directory, supplement thereto, or elsewhere, Licensee agrees not to hold Licensee liable in any way for any damage caused by such incorrect listing or reference, unless such damage was the result of an intentional tort, willful act, or gross negligence by Licensee.
C.12 Licensee shall indemnify and hold Licensee harmless as to any expense whatsoever for any claims, losses, or defense of claims or losses, which may be asserted against Licensor by reason of this Agreement and services performed hereunder, so long as such claims or losses shall not have risen directly or indirectly as a result of any act or omission of Licensee or of its agents.
C.13 Neither party shall make use of the others trademarks, trade names or name in any manner without the prior written approval of the other, provided each party hereby authorizes the other, by way of certification of this Agreement, to state that the Licensee is a participant in this Certification Program.
This LICENSE AGREEMENT may not be transferred, assigned, nor otherwise disposed of to any other company, individual, or successor company.

FOREWORD

Acceptance of certified sealed insulating glass comes with the conviction that such certification assures a high level of quality and the integrity of the identifying mark or certification label is being reliably maintained by a competent certifying agency.

The proposed ASTM specification for sealed insulating glass provides a sound technical basis for the required quality of sealed insulating glass. With the addition of independent administration plus periodic routine inplant visits and product evaluation, a program of product certification is developed in accordance with the accepted American National Standards as contained in American National Standards Z34.1. The certification program described here is predicated upon the concept of independent and impartial administration of the certification procedures in the IGCC license agreement.

To insure administration of the certification program in a uniform and equitable manner, this procedural guide has been prepared for the information and guidance of the licensees.

It should be noted that the IGCC license agreement is the governing document for operation of the certification program. This procedural guide, which is not an extension of that document, serves merely to describe the administrative procedures and routine operation of the certification program.

GENERAL INFORMATION

The Certification Concept

The IGCC certification program is based upon the conviction that no standard of quality is good without the continuous adherence of the participants to that standard.

To buyers, specifiers, code officials and users, the IGCC certification label offers the manufacturer's assurance that his sealed insulating glass units have been produced in conformance to the proposed ASTM specification E6-P3.

Who Can Participate?

Every manufacturer of sealed insulating glass is eligible, on a voluntary basis, to participate.

Who Conducts the Program?

The Insulating Glass Certification Council, a non-profit corporation, is the sponsor of this certification program. IGCC supervises the certification program under which the administrator periodically checks and reports compliance of the manufacturers of products having the IGCC certification label.
Administration

Certification Services Corporation (CSC), is the independent administrator of the Certification program. CSC maintains the IGCC office of certification and handles the routine day to day business. All transactions are done in the name of IGCC.

How Can You Become a Participant?

The following must be accomplished before IGCC can allow a manufacturer to certify an item in this program:

a) The manufacturer signs two copies of the IGCC license agreement (including notarization of the Affidavit, Appendix A) and sends these to IGCC. IGCC will countersign both copies and return one to the licensee.

b) The licensee sends to IGCC the twelve month certification fee (including the test laboratory fee).

c) The Appendix A contains a description of the model which is to be certified.

d) Within 120 days IGCC visits the manufacturing location and determines to its satisfaction that the sealed insulating glass units being manufactured are in fact truly represented by the declaration of Appendix A as to the model. Once this is established, IGCC asks the manufacturer to produce twelve test specimens. The manufacture of these twelve test specimens is witnessed by IGCC and IGCC verifies that they are produced in accordance with the model declaration.

e) The licensee is instructed to send these test specimens to an official IGCC testing laboratory where they are tested.

f) After receipt by IGCC of the test report from the laboratory, the administrator validates that particular model. IGCC sends to the licensee a notice of product certification which includes the IGCC certification number. This number must be incorporated into the permanent label to be affixed on each certified sealed insulating glass unit.

g) The certified model will then be listed in the next published certified products directory.

HOW THE CERTIFICATION PROGRAM WORKS

American Society for Testing and Materials has proposed test methods and specifications for sealed insulating glass. Sealed insulating glass must meet or exceed the applicable specification before it can be certified.

IGCC recognized independent testing laboratories conduct all tests. All laboratories, whose test reports are utilized by this certification program, shall be approved by the IGCC certification committee.

Administrator Authorizes Certification

As sole judge of compliance with the applicable specification, the administrator authorizes a product which has been approved to be listed in the certified products directory.
Licensees label sealed insulating glass units in accordance with the labeling requirements established by the IGCC certification committee.

Approved products are listed in the certified products directory, which is published at least every six months. It is sent to door, sash and building manufacturers, glazing contractors, home builders, architects, regulatory agencies and code-making groups, etc. Directory listings contain the licensee's name, plant location and product description.

The administrator verifies production at each licensee's manufacturing location twice per year.

An approved testing laboratory determines compliance of sample specimens with specifications. Tests are made at the laboratory recommended by the licensee and selected by the administrator from the approved list. Results of each test are mailed promptly to the licensee by the administrator.

**COMPLIANCE SAFEGUARDS**

*How is Compliance Assured?*

Any certified product found in the course of routine inspection and evaluation not to be in compliance with the model description, is subject, after receipt of notification by telephone and or certified letter, to having certification removed. The licensee is given a thirty day grace period in which to demonstrate to the satisfaction of the administrator that his product is in compliance with the model description that is certified. If he does not, certification is automatically terminated at the end of the thirty day period.

*Challenging a Certified Product*

Complaints of non-compliance from any corporation or business source will be investigated promptly by IGCC upon receipt of the complaint in writing along with an appropriate surety deposit. A minimum surety deposit of $1,500 will be required for each complaint of non-compliance. The surety deposit will be assessed at the rate of $300 per man day plus the reasonable cost of travel and other expenses entailed in resolving such incidents. Refunds of part or all of the surety deposit will be made when applicable. All costs involved will be paid from the complainant's surety deposit, unless the investigation proves non-compliance, in which case all costs will be borne by the licensee found to be in non-compliance.

*Complaints by Consumers*

The administrator shall receive and log the complaint; responding to the consumer with a certified products directory and instructions on how to locate the IGCC label.

It will be the consumer's responsibility to identify the label, number, class and date code which appear on the spacer or glass and advise the administrator of the same. Note: If no IGCC label exists, the product has not been certified by the manufacturer to IGCC and the administrator and IGCC have no further responsibilities or options.

Once the consumer has identified the label, number, etc. and advised the administrator, the administrator shall respond, advising the consumer of the name, address, primary contact, model description and other pertinent information at hand as it pertains to the subject licensee. Note: If the complaint is being made for reasons of product appearance or failure such as glass quality, fogging, seal failure, dust, etc., the consumer shall be advised to contact the licensee or manufacturer directly. Some manufacturers
and their dealers or distributors offer warranties on their products; normal claims procedures and legal remedies are available to consumers on a state by state basis.

If the consumer wishes to determine whether or not a labeled product is in compliance with the model described through an investigation by IGCC, the corporation or business challenge procedure shall be utilized. The surety deposit shall be modified to $400 and charges per man day shall be assessed against the surety deposit in the amount of $300 plus reasonable travel costs and other expenses.

Withdrawal of Certified Product

Any product which has been certified may be voluntarily withdrawn from the Certification Program by the licensee at any time.

COSTS

What Does the Program Cost?

The licensee pays all projected fees to IGCC on a twelve month basis in advance. A licensee is invoiced for each item that is certified and listed separately in the certified products directory. This invoice would include the fees for future routine evaluation testing.

Initial certification for each item will be for a period of twelve months commencing with acceptance of the license agreement. The next invoice will be for a period of twelve months.

CERTIFICATION PROGRAM DOCUMENTS AND AGREEMENTS

License Agreement

This agreement, incorporating independent program administration and routine, periodic, independent plant inspections, sampling and evaluation, governs the relationship between IGCC and the licensee.

Future amendments or revisions to the license agreement will be recommended by the IGCC certification committee and enacted by the IGCC Board of Governors.

Effective Date, Duration, and Termination

The License Agreement becomes effective on the date of its execution and has an initial duration of twelve months and shall be renewed automatically for successive periods of twelve months each, unless licensor or licensee, at least sixty days prior to the date of expiration gives notice in writing, that cancellation is requested or unless revoked by licensor for causes set forth in this agreement.

Administrative Service Agreement

This agreement, entered into by IGCC and Certification Services Corporation, governs the relationship between IGCC and CSC, the independent administrator. In general, it provides that the administrator:

a) routinely inspects licensee manufacturing facilities twice per year and during the first inspection witnesses fabrication of specimens for testing at one of the IGCC testing laboratories

b) has the right to witness any and all testing

28 IGCC; August 1, 1978
c) reviews all test reports in order to determine compliance of the certified product with the specifications

d) inspects and approves all test laboratory test facilities for use in this certification program (test laboratories are recognized or approved by the IGCC certification committee)

e) publishes and mails the IGCC certified products directory twice each year

f) handles all routine clerical duties of IGCC with respect to certification matters

g) acts as IGCC treasurer, invoicing licensees, maintaining a bank account and dispersing funds (fiscal reports are made to the IGCC Board of Governors)

h) attends all scheduled meetings of the IGCC certification committee and

i) in all of its actions acts in the name of IGCC.

**Procedural Guide**

This guide outlines program procedures in accordance with the provisions of the License Agreement and the Administrative Service Agreement, for the guidance of those concerned with the procedural details of the certification program's operation. It covers the steps to be taken in any given procedural situation in the interest of equitable and uniform treatment of licensees and the preservation of the integrity of the certification program.

**Certified Products Directory**

This directory is the one document and publication that is normally in the public's eye and contains a listing of the certified sealed insulating glass units of each licensee.

**Certification Label**

This certification mark is permanently affixed to each unit of certified sealed insulating glass by the licensee. It contains a code that refers to the listing in the certified products directory. The listing then provides a product description including the company name, plant location, etc.

**PROGRAM RESPONSIBILITY**

The IGCC Board of Governors has overall responsibility for the well being and acceptance of the certification program by the industry, building officials and the public. It also bears legal corporate responsibility.

The IGCC certification committee has the responsibility for the general procedure and policy pertaining to operation of the certification program. As a part thereof, it:

a) establishes "guidelines"

b) determines the applicability of the specifications in a specific situation where a question is raised by a licensee or the administrator

c) approves test laboratories
d) determines which of the specifications are to be designated effective for the purposes of product certification and the date or dates on which they become effective.

e) recommends to the IGCC Board of Governors changes to be made in the license agreement.

COMMUNICATIONS

In all matters concerning the administration and implementation of the IGCC certification program, correspondence may be directed to any of the following:

IGCC Board of Directors
Mr. Roger D. O'Shaughnessy, President
Cardinal Insulated Glass Company
6700 Excelsior Boulevard
Minneapolis, Minnesota 55406
Telephone 612-935-1722

IGCC Certification Committee
Mr. Donald J. Vild, Chairman
Libbey-Owens-Ford Company
1701 East Broadway
Toledo, Ohio 43605
Telephone 419-247-4231

Insulating Glass Certification Council
Mr. Robert A. Nance, P. E.
Administrative Manager
1640 West 32 Place
Hialeah, Florida 33012
Telephone 305-558-1480

CERTIFICATION GUIDELINES AND INTERPRETATIONS

For guidance in labeling and certifying sealed insulating glass units the IGCC Certification Committee has adopted the following:

ALWAYS
The following situations permit the licensee to always certify and label the sealed insulating glass units with the same IGCC number.

GLASS

A.1
Any change in glass thickness from that tested (3/16 inch is required in test specimens).

A.2
Any change in glass tint or color from that tested (clear glass is required in test specimens).

A.3
Any change in glass size from that tested (14 by 20 inches is required for test specimens).

A.4
Any change in glass type (i.e. tempered, heat strengthened, laminated or patterned glass) from that tested (annealed glass is normally used in test specimens).

A.5
Any change in glass shape from that tested (rectangular glass is required in test specimens). This guideline permits the same IGCC number on triangular, circle head, trapezoidal and other shapes.

A.6
Any change in glass supplier from that tested.

SPACER

A.1
Any change in air space dimension from that tested (one quarter inch air space is required in test specimens).

A.2
Any change in spacer wall thickness from that tested.

A.3
Any change in spacer seam design (i.e. butt seam or lock seam) from that tested.
A.4
Any change in supplier of spacer from that tested, everything remaining the same.

A.5
Soldered, welded or brazed spacer corners may be used with the same IGCC number.

A.6
Mechanically fastened and sealed corners (those with keys) may be changed from one material to another provided that the substrate of the key does not change from that tested. It can be changed to the substrate of the spacer, however.

DESICCANT

A.1
Equal amount or increase in quantity of the identical desiccant per inch of edge will not require a different IGCC number, however up to one fourth less may be used in proportion to reduction of air space dimension from that tested.

A.2
A change in supplier of the same general type of desiccant from that tested will not require a different IGCC number.

SEALANT

A.1
Any increase in moisture vapor transmission path length is an acceptable alternate for labeling.

NEVER
The following situations never permit the licensee to certify and label with the same IGCC number. They require the use of a different IGCC number.

SPACER

N.1
A change in spacer material, i.e. aluminum to steel or any other material will require a different IGCC number.

N.2
A change in spacer surface finish, i.e. anodized to mill finish or hot dip to electro galvanized, will require a different IGCC number.
N.3
A change in corner design from mechanical to soldered, welded or brazed and vice versa will require a different IGCC number.

N.4
A change in corner key material to another material, except for same material as the spacer, will require a different IGCC number.

DESICCANT

N.1
A change in general type of desiccant will require a different IGCC number.

SEALANT

N.1
In a single sealant system, a change in general type of sealant will require a different IGCC number.

N.2
In a two sealant system, a change in general type of primary sealant will require a different IGCC number.

N.3
In a two sealant system, a change in general type of secondary sealant will require a different IGCC number.

N.4
Any decrease in the minimum design moisture vapor transmission path length will require a different IGCC number.

N.5
Any increase in thickness of design moisture vapor transmission path (glass to spacer dimension) will require a different IGCC number.

GENERAL

G.1
A licensee is permitted to insert the open end of a breather tube in a bag or container of desiccant during shipment of a specimen to the test laboratory.

G.2
The addition of a breather tube is acceptable even though not in the test specimen.

G.3
The addition of edge protection such as metal banding, metallic foil, barrier coat, etc. is acceptable with the same IGCC number.
G.4
Inorganically coated glass may be used provided that the sealant or sealants contact glass or contact silica or a glass like material and no other organic materials have been introduced into the system and the layers of silica and metal have a bond strength in excess of the sealant bond strength.

G.5
Situations that are not included in the above always or nevers fall into the gray area. The gray area situation is covered by minutes item 10.10.77.10 and is repeated here:

When there is a change and the licensee desires to use the same IGCC number, the licensee shall:

1) immediately notify the administrator with all details of the change.
2) establish equivalency by passing the same level of ASTM test as certified to by:
   a) having a prototype tested at an IGCC independent testing laboratory or
   b) having a prototype tested at an in house (licensee) facility or
3) demonstrate the equivalency of the change to the satisfaction of the certification committee. (Prototype not required.)

Prototypes must be fabricated and submitted to the laboratory within two weeks after notification of the administrator. During the test period, the licensee may temporarily use the certification label on a provisional basis.

Testing done in house by a licensee must be done under the surveillance of the administrator.

G.6
Twelve specimens will be fabricated for testing purposes.
PARTICIPANT'S AGREEMENT

I have read the PURPOSES of the INSULATING GLASS CERTIFICATION COUNCIL and hereby declare that I have a legitimate interest in the goals of the Council. I further declare that I do not manufacture insulating glass units nor am I employed by any company which is in such manufacturing business; as such I do not qualify to become a Licensee of the Insulating Glass Certification Council.

In view of the above declaration, I wish to be recognized as a "participant" in the Insulating Glass Certification Council.

Print Name: ___________________________ Date: ___________________________
Address: _______________________________ Phone: __________________________
City: _______________________________ State: ________ Zip: __
My interest in the Council is: ____________________________________________

Signature: ___________________________________________________________________

ARTICLE II

Section 1 - PURPOSES

The purposes of the Insulating Glass Certification Council shall be:

1. Promote public benefit by encouraging maintenance of the highest standards of excellence in the manufacture of insulating glass.

2. To encourage and cooperate in developing standards related to performance characteristics of insulating glass products.

3. To plan, organize, direct, coordinate and sponsor a certification program for insulating glass manufacturers to assure that their products meet applicable standards and/or performance requirements, adopted or approved by the Council.

ANNUAL FEE

The annual fee for a participant will be $100.00 per company.

There will be no fee for public interest or consumer participants.
future editions of this certified products directory will be sent to individuals making a request on their corporate letterhead.
